

Homework 6A

Taeyoung Yun

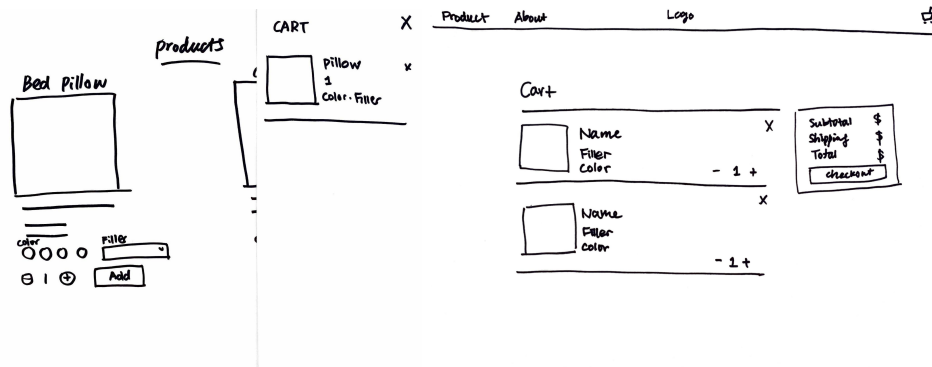

1. Links

[Link to the Website](#)

[Link to the Source Code](#)

2. Low & High-Fidelity Prototype

- A low-fidelity prototype and design choices: The cart on the previous design takes up less than half of the page, but I changed it to the full pageview. I decided to change it in order to provide adequate information about the products with sufficient white space.
- Before → After

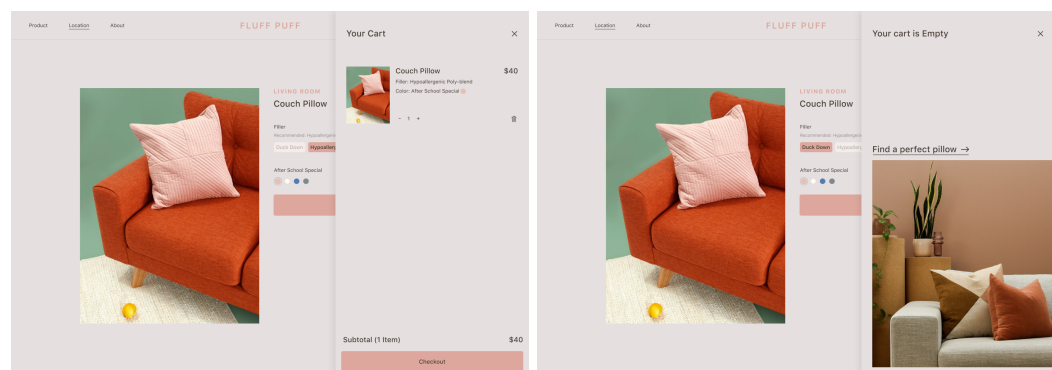

- A high-fidelity digital mockup and design choices:

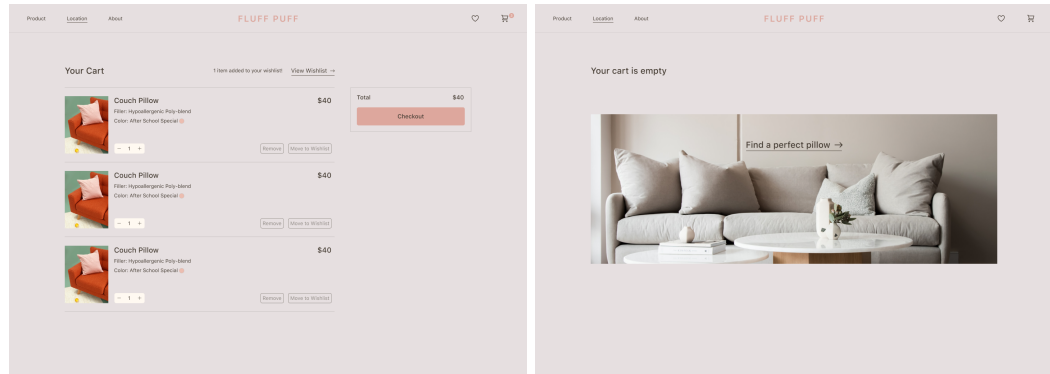

[Link to Figma](#)

Considering that the list of products gets longer, I moved the total price section to the right, not below the product list. I also added a button to move the product to a wishlist to keep track of the product they are interested in.

- Before

- After
